Postgraduate Opportunities

ChM in Clinical Ophthalmology

Masters by online distance learning

This two year part-time Masters programme in Clinical Ophthalmology, taught entirely online, is offered by the University of Edinburgh in partnership with the Royal College of Surgeons of Edinburgh and leads to the degree of Master of Surgery (ChM). This programme was developed with the support of NHS Education for Scotland (NES).

Based on the curricula of the FRCSEd (Ophth) and FRCOphth in the United Kingdom and Ireland, this vocational ChM programme provides the opportunity for advanced trainees in Ophthalmology to study modules relevant to their declared subspecialty, and supports learning for the Fellowship examinations of the Royal College of Surgeons of Edinburgh (FRCSEd Ophth) and Royal College of Ophthalmologists (FRCOphth).

Trainees will be taught by experienced tutors, all leading clinicians in their field, and will have access to a large structured learning resource of educational materials, including an unparalleled online library facility. Illustrative cases will cover technical skills and procedures as well as core knowledge.

This programme aims to provide high standard, flexible advanced training for the next generation of medical and surgical ophthalmologists, linking an academic degree to the fellowship examinations, and to develop the trainee's academic portfolio and facilitate ophthalmology research projects.

On completion of this programme students will be able to:

- demonstrate in-depth knowledge of their chosen specialty, and be able to apply this knowledge to the systematic assessment and management of medical and surgical patients in the elective, urgent and emergency clinical setting;
- recognise the leadership contribution and responsibilities of the ophthalmologist in the multidisciplinary management of complex medical and surgical disease;
- critically reflect upon day-to-day medical and surgical practice in the context of recent advances, and engage in critical dialogue with peers and experts in other sub-specialties;
- apply the general principles of clinical study design, ethics, and statistics to critically evaluate the scientific literature in medical and surgical research, and make informed judgements on new and emerging issues in medicine and surgery;
- exercise a high level of autonomy and initiative in professional activities at a level of independent medical and surgical practice.

The University of Edinburgh is a charitable body, registered in Scotland, with registration number SC005336.

THE ROYAL COLLEGE
OF SURGEONS OF
EDINBURGH

Programme Structure

Year 1

Semester 1

- Ophthalmology 1
- Core Ophthalmology
- Applied Basic Sciences, Examination and Surgical Strategies
- Diagnostics and Technologies in Clinical Practice

Semester 2

- Ophthalmology 1
- Core Ophthalmology
- Clinical Decision Making, Therapeutics, Avoiding and Managing Complications
- Acute Ophthalmology, Trauma and Advanced Surgical Techniques

Year 2

Semester 1

- Ophthalmology 2
- Core Academic Activity

Semester 2

- Examination (MCQ and EMI)
- Specialist Academic Activity

www.ed.ac.uk/ophthalmology/masters

Medical Council. UK trainee applicants will be expected to have completed initial (ST) specialist training years 1-2 or (CT) core training years 1-2 and early intermediate (S3) phases of their training programme and would normally be commencing Intermediate Phase (ST4) of their training.

learning nature of this programme is perfect for doctors working unsocialable shift patterns. It is accessible to individuals with access to a computer and internet connection anywhere in the world.

- Advanced training for ophthalmologists preparing for the fellowship examinations; this programme offers:
- Flexible learning throughout the year to complement busy working lives and shift patterns;
- Mentoring through online discussions;
- Participation in the programme from computers connected to the internet located anywhere in the world;
- Access to many high quality interactive online resources/e-journals and online textbooks;
- A distinguished postgraduate qualification from a Russell Group University.

Our online programme runs over two years and is delivered proportionally over 10-15 hours of study each week in a flexible modular manner. It is anticipated that some of the students will receive credit or 'mirror' 'in-the workplace' activities. In the first year of the programme, core modules will cover the basic elements of the role of the specialist (elective and emergency opthalmic pathology both medical and surgical). In preparation for a consultancy post. Modules will be taught and assessed using a clinical problem-based approach, supported by systems-based review of the course material. In the second year, students will have the opportunity to undertake a tailored academic module that reflects their specialist interests. Academic modules (core and specialist) will explore research and teaching methodology, as well as develop skills to ensure an ability to analyse published evidence and explore interactive events and written clinical communication skills. Trainees will be required to complete an academic critique in an appropriate subspecialty area of work undertaken during the two year period of study such that resulting from a publication in a peer-reviewed journal.

Call for Scholarship Applications:

All Eyes on Future Leaders in Ophthalmology

The David and Molly Pyott Foundation Scholarships in Ophthalmology and The University of Edinburgh

Application Deadline: Tuesday 1st June 2021, 23:59 DST

The University of Edinburgh is delighted to announce that they plan to award twelve [scholarships](#) this summer for successful applicants to their online Master of Surgery (ChM) in Clinical Ophthalmology programme, thanks to the very generous support of The David and Molly Pyott Foundation.

Trainees/residents/registrar in Ophthalmology and qualified early career ophthalmologists (generalists and specialists) from Africa, Central and South Asia, Caribbean Islands, Pacific Islands, Central and Latin America who are accepted for admission to the online ChM programme commencing in September 2021 are eligible to apply for the scholarship award which will cover all tuition fees as well as internet access and a laptop. **The deadline for scholarship applications is Tuesday 1st June 2021, 23:59 DST.**

The part-time, online two-year ChM programme is offered by the University of Edinburgh in partnership with the Royal College of Surgeons of Edinburgh and is designed to support specialist trainees/residents/registrar in ophthalmology in the United Kingdom and internationally by providing advanced education for those preparing for the fellowship examinations of the Royal College of Surgeons of Edinburgh (RCSEd) and the Royal College of Ophthalmologists (RCOphth) and those approaching consultancy.

The David and Molly Pyott Foundation has been funding this highly successful programme of scholarships in partnership with the University since 2016. This initiative has seen trainee and qualified ophthalmologists (generalists and specialists) from a range of developing countries being educated and trained at Masters level, online, as part of their journey to becoming consultant/specialist ophthalmologists. The online, part time nature of the ChM means that students can study in their home countries without having to take time out of practice or training, whilst continuing to deliver critical care in regions with ophthalmic workforce capacity issues and adapting to training and working on the frontline in the battle against COVID-19.

Six of the twelve scholarships on offer will support trainees/residents/registrar in ophthalmology and qualified early career ophthalmologists with leadership potential who are nationals of and are resident/working in member countries* of the College of Ophthalmology of Eastern, Central and Southern Africa (*as defined on COECSA website, March 2021). It is anticipated that, by seeding a cohort of well-trained, motivated and supported professionals in areas of greatest need, patients of the future will have access to the eye-care that they need to save their sight.

A total of 36 students have been enrolled in the ophthalmology scholarship programmes to date. This includes the first cohort of sponsored students from Eastern, Central and Southern Africa, representing Kenya, Malawi, Tanzania and Zambia, who began their studies in September 2020.

Further ChM programme information is [available online](#), along with an [introductory video](#) by Baljean Dhillon, Professor of Clinical Ophthalmology at the University of Edinburgh and Chair of RCSEd's Ophthalmology Speciality Advisory Committee, and [video testimonials](#) by ChM graduates. The ChM is one of a number of Edinburgh Surgery Online Masters programmes in the surgical specialities

delivered by the University in partnership with RCSEd. Applications for admission to the ChM close on **27th August** for September 2021 entry.

Professor Baljean Dhillon (left) and Mr David Pyott (right)

Dr Julia Furtado-Heringer (left), Pyott Scholar from Brazil, after receiving the Sir Arthur Conan Doyle Medal in Clinical Ophthalmology from RCSEd President, Professor Michael Griffin (right) in November 2019 in Edinburgh. This medal is awarded to the ChM's top performing graduate. Dr Heather Ellis (centre), Senior Lecturer, University of Edinburgh, is co-founder and course organiser of the ChM.

Quotations from Dr Julia Furtado-Heringer (from her video testimonial):

"It is really, really interesting because although it is an online programme you feel like you are in the university because you have access to library, papers, professors, teachers so you don't feel abandoned in your home all the time. I could interact with the teachers and I could interact with the

facilitators so although it was online you could feel like I was doing a Master's degree in the University."

"I think you learn a lot about yourself too and about ophthalmology and how to relate to your patients. It is really interesting that you learn with other people from different backgrounds in different protocols so it is not only the way you do it in your country but how it is done in Edinburgh or London, Africa, Asia so you have contact with people from all over the world and it definitely enhances your practice."

THE UNIVERSITY *of* EDINBURGH

Introduction to the ChM (Master of Surgery) in Clinical Ophthalmology

The ChM (Master of Surgery) in Clinical Ophthalmology is one of the Edinburgh Surgery Online suite of postgraduate taught Masters programmes in the surgical specialities offered by the University of Edinburgh's Medical School in partnership with the Royal College of Surgeons of Edinburgh (RCSEd). The ChM CO was also developed in conjunction with NHS Education for Scotland (NES). This two-year, part-time Masters programme, designed to support advanced ophthalmology trainees / residents / registrars in the UK and internationally, is taught entirely online with learning materials and teaching delivered via a password-protected virtual learning environment.

The ChM in Clinical Ophthalmology is studied over 2 years part-time (or up to 4 years) by online distance learning and leads to the award of [Master of Surgery \(Magister Chirurgiae\)](#) [120 credits at Scottish Credit & Qualifications Framework (SCQF Level 12), equivalent to European Qualification Framework (EQF) Level 8].

ChM CO Launched: September 2015. Inaugural cohort graduated in 2017. Second cohort graduated in 2018, third in November 2019 and fourth in December 2020.

Target audience: Advanced trainees/residents/registrar in ophthalmology (UK ST3/4 grade and beyond or international equivalent) and early career ophthalmologists in independent practice with leadership potential.

Programme Director:

Professor Baljean Dhillon, BMedSci(Hons), BMBS, FRCS(Ed), FRCPS(Glasg), FRCOphth, FRCPE

Professor of Clinical Ophthalmology, Deanery of Clinical Sciences, Edinburgh Medical School, College of Medicine & Veterinary Medicine, University of Edinburgh; Honorary Ophthalmic Surgeon, NHS Lothian, Edinburgh; Chair of RCSEd's Ophthalmology Speciality Advisory Board & Lead Examiner for FRCS(Ed) (Ophth), leading the collaboration with the International Council of Ophthalmology regarding joint fellowship examinations; President of The Scottish Ophthalmological Club; Executive Officer Council Member of the Oxford Ophthalmological Congress.

- [Read more about Professor Dhillon](#)

Programme Co-Director:

Professor Roshini Sanders, MBChB, DO, FRCSOphth(Ed), FRCOphth(Lond)

Consultant Glaucomatologist, NHS Fife, Scotland; NIHR Ophthalmology Lead for Scotland; Honorary Professor in Clinical Ophthalmology, University of Edinburgh; Examiner for FRCS(Ed) (Ophth).

Course Organiser:

Dr Heather Ellis, BA, MA(Hons), PhD (Tel: +44 (0)131 536 2033 / Email: heather.ellis@ed.ac.uk)

Academic Lead, Personal and Academic Tutor, Deanery of Clinical Sciences, Edinburgh Medical School, College of Medicine & Veterinary Medicine, The University of Edinburgh

- [Read more about Dr Ellis](#)

ChM Programme structure

The programme runs on a semester basis following the academic year (September to July) and involves a minimum of 10-15 hours study each week in a flexible, modular manner, following a weekly timetable of learning activities. Compulsory courses covering the sub-specialities in clinical ophthalmology are aligned to the ophthalmology fellowship curricula of the Royal College of Surgeons of Edinburgh (FRCSEd) and the Royal College of Ophthalmologists (FRCOphth). Courses run for either 15 or 30 teaching weeks.

Students are taught by experienced tutors – leading clinicians in their fields – and they have access to well-defined and managed learning resources and educational material, including an unparalleled online library facility. Illustrative cases will cover technical skills and procedures as well as core knowledge and clinical skills.

Year 1 courses: 60 credits (Equivalent to 600 hours)

In Year 1, students study six compulsory courses: *Ophthalmology 1; Core Ophthalmology; Applied Basic Sciences, Examination and Surgical Strategies; Clinical Decision Making, Therapeutics, Avoiding and Managing Complications; Diagnostics and Technologies in Clinical Practice; Acute Ophthalmology, Trauma and Advanced Surgical Techniques.*

Year 2 courses: 60 credits (Equivalent to 600 hours)

In Year 2, students study two compulsory taught courses: *Ophthalmology 2; and Core Academic Activity* (includes research methods and reflective ePortfolio). They will attend an *Examination (MCQ and EMI)* for the taught courses from Years 1 and 2. They will complete a research project for the compulsory *Specialist Academic Activity* course, the assessment for which is split into phases and includes a final project e-report (7,500-10,000 words).

Cumulative credits by the end of Year 2: 120 credits, award ChM

Career opportunities

The ChM programme provides advanced education for medical and surgical ophthalmologists preparing for the membership and fellowship examinations of the RCSEd and RCOphth and for those approaching consultancy. It will also prepare them to integrate academia or research into their career without having to take time out of training or practice. The award of ChM will highlight their commitment to continuing professional development and will ensure a competitive edge when applying for consultant positions.

Entry requirements

A medical degree (MBChB or equivalent) recognised by the General Medical Council. Applicants should also be based in a supervised ophthalmology specialist training programme.

UK applicants should have completed initial specialist training (ST 1/2) or core training (CT 1/2) and early intermediate training (ST 3), and will normally be starting their intermediate training (ST 4).

Applicants from outside the UK, and applicants who are not in a recognised training programme, must demonstrate that the course is directly relevant to their ophthalmic specialist training.

They should have completed a minimum of 24 months of core training in the surgical specialties and 18 months of specialty training in ophthalmology before enrolling. We will also consider applications from established ophthalmologists in independent practice.

In Summary:

The ChM in Clinical Ophthalmology has been designed to support, supplement and advance clinical learning, develop clinical research skills and provide a platform from which ophthalmologists in training are mentored by consultants during this postgraduate programme. The general and subspeciality content follows the curricula of RCSEd and RCOphth and the learning objectives are mapped to competencies required of UK trainees sitting exit examinations for the Certificate of Completion of Specialist Training (CCST). The format of our ChM programme delivery incorporates a multimedia mix of learning tools and activities including asynchronous discussion boards, video lectures, virtual clinics, e-portfolio reflective diaries and an unparalleled online library facility. Illustrative cases cover technical skills and procedures as well as core knowledge. Students apply their academic skills to produce an original piece of applied research in their second year which is written up as a project report and which contributes to their assessment.

The international ophthalmology teaching Faculty has the experience and expertise to deliver clinically-relevant content across the range of medical and surgical ophthalmology to a global studentship. The Faculty are mindful of the varied culture, climate and geographic contexts in which students practise ophthalmology and the limitations in resources available in less affluent settings. This has shaped the way in which didactic and discursive topics are prioritised and practised within the virtual learning environment (VLE) which hosts and delivers all of the learning content. This is one of the unique features of the ChM in Clinical Ophthalmology.

The online, distance-learning nature of this programme is perfect for doctors working unsociable shift patterns and there is no need for them to take time out of practice or their training programmes to study with us. It is accessible to individuals with access to a computer and internet connection anywhere in the world. We recommend that students commit a minimum of 10-15 hours per week to their studies.

The David and Molly Pyott Foundation Scholarships in Ophthalmology

Twelve online learning Masters scholarships are available in the field of Ophthalmology for eligible applicants from Africa, Central and South Asia, Caribbean Islands, Pacific Islands, Central and Latin America who have been accepted for admission to the two-year, part-time online ChM (Master of Surgery) in Clinical Ophthalmology in academic session 2021-2022 which commences in September.

Award

Each scholarship will cover the tuition fees for the entire programme of study and funding towards a laptop and internet service. The award is tenable for two academic years, subject to academic progress.

The scholarship is funded by the generous support of The David and Molly Pyott Foundation. The deadline for applications is **23:59 DST on Tuesday 1st June 2021**.

Eligibility

The scholarships will be awarded to eligible candidates who are accepted for admission to the online Master of Surgery (ChM) in Clinical Ophthalmology at the University of Edinburgh, one of the Edinburgh Surgery Online suite of Masters programmes. Applicants should already have been offered a place at the University of Edinburgh and should have firmly accepted that offer or be intending to do so, before applying for the scholarship. Applicants should be advanced trainees/residents/registrar in ophthalmology. Applications from ophthalmologists in independent practice may also be considered.

Applicants must be both nationals of and resident in the following countries:

Algeria	Chile	Guyana	Morocco	South Africa
Angola	Colombia	Honduras	Mozambique	South Sudan
Argentina	Comoros	India	Namibia	Sri Lanka
Azerbaijan	Congo	Indonesia	Nepal	Sudan
Bangladesh	Congo (Democratic Republic)	Ivory Coast	Nicaragua	Suriname
Belize	Costa Rica	Kazakhstan	Niger	Swaziland
Benin	Djibouti	Kenya	Nigeria	Tajikistan
Bolivia	Ecuador	Kyrgyzstan	Pakistan	Tanzania
Botswana	East Timor (Timor Leste) Egypt	Laos [Lao PDR]	Panama	Thailand
Brazil	El Salvador	Lesotho	Paraguay	Togo
Brunei [Brunei Darussalam]	Equatorial Guinea	Liberia	Peru	Tunisia
Burkina	Eritrea	Libya	Philippines	Turkmenistan

(Burkina Faso)				
Burma [Myanmar]	Ethiopia	Madagascar	Rwanda	Uganda
Burundi	Gabon	Malawi	Sao Tome and Principe	Uruguay
Cambodia	Gambia, The	Malaysia	Senegal	Uzbekistan
Cameroon	Ghana	Mali	Seychelles	Venezuela
Cape Verde	Guatemala	Mauritania	Sierra Leone	Vietnam
Central African Republic	Guinea	Mauritius	Singapore	Zambia
Chad	Guinea-Bissau	Mexico	Somalia	Zimbabwe

Also eligible are applicants (nationals and residents) of the:

[Caribbean Islands](#)

Pacific Islands

Criteria

Selection for scholarships is based on academic merit and the personal statement in which students describe their current contribution to their country's local and national ophthalmology development plans and how they will use the scholarship to further contribute to the development of ophthalmology services in their country.

Successful applicants will be committed to working in their country's ophthalmology service on completion of their studies; to using their new found skills to further enhance and develop the service; and to fostering clinical and academic links between their country's medical universities, ophthalmology teaching hospitals and research institutes and The University of Edinburgh.

Applying (NB two separate, online application processes involved)

1. Applicants must first of all complete an online EUCLID application for admission to the ChM (Master of Surgery) in Clinical Ophthalmology – instructions on full application process can be found on the University's degree finder page [here](#). They then need to wait for a decision on their application for admission to the ChM via EUCLID.
2. If eligible to join the course, applicants will be given a conditional or unconditional offer, which they must accept via EUCLID **prior** to applying separately for a scholarship.
3. Once in possession of an offer of admission to the ChM, students may **apply online for the scholarship via the Edinburgh Surgery Online (ESO) website's [Scholarships section](#) by 23:59 DST Tuesday 1st June 2021.**

In the ESO Scholarships section, students should click on The David and Molly Pyott Foundation Scholarships title and then click on the link to apply online. They will be asked to enter the following information:

Page 1: University Application Number

Enter your University application number (UUN) that you will have received from your online EUCLID application for a place on the ChM.

Page 2: Tell Us Where You Are Based

Do you reside in and are you a national of one of the LMIC countries listed? (Yes/No) Please state which one(s).

Page 3: Personal Statement

Include a personal statement (maximum 500 words) in which you describe the following:

- your reason for applying for the Masters programme
- how undertaking this course of study will benefit your career, and
- how you envisage this course enhancing your working practices to transform ophthalmology services in your country to improve eyecare.

Page 4: CV (Resumé)

Include a copy of your CV (resumé).

Page 5: Letter of Support

Include a letter of support for your scholarship application from your Ophthalmology Educational/ Training Programme Supervisor or Director in your locality. It is important to us that our scholars are supported in their workplace whilst studying with us.

Final Page

Acknowledgement of your scholarship application will be provided by the ESO team in due course.

Notification

All applicants will be notified of the outcome by the end of July 2021. Please note that acceptance for admission to the ChM does not guarantee acceptance for a scholarship.

Please note that these scholarship awards are likely to be oversubscribed and there is no guarantee applicants will be successful.
