Lasting comfort and protection make dry eye easy to forget

Unique "in the eye" gelling and lubricating formula^{1,2}

When **SYSTANE™**, pH of 7.0 combines with natural tears, pH of 7.4, the borate ions form reversible cross-link with HP-Guar creating a network with a gel-like consistency. HP-Guar helps keep the demulcent system on the surface of the eye longer.

Ocular shield forms allowing the natural healing process to occur^{1,2}

Prolongs protection of the ocular surface^{1,2}

The soft gel-like consistency prolongs protection by enhancing the integrity of tear film.

Good symptomatic relief

SYSTANE™ is the lubricating eye drop that provides a stable cross-link matrix of polymers for adherence of demulcents to the ocular surface. This explain why **SYSTANE™** can provide the good symptomatic relief and why clinical signs can improve remarkably with continued use.³

Systane™
LUBRICANT EYE DROPS

Drug Facts

Active Ingredients

Polyethylene Glycol 400 0.4%lubricant

Propylene Glycol 0.3%lubricant

Inactive Ingredients: Boric acid, calcium chloride, hydroxypropyl guar, magnesium chloride, polyquaternium-1 as a preservative, potassium chloride, purified water, sodium chloride, zinc chloride

Uses: for the temporary relief of burning and irritation due to dryness of the eye

Warnings: For external use only

Do not use

• if this product changes color or becomes cloudy • if you are sensitive to any ingredient in this product

When using this product

• do not touch tip of container to any surface to avoid contamination

• replace cap after each use

Stop use and ask a doctor if

• you feel eye pain • changes in vision occur
• redness or irritation of the eye (s) gets worse or lasts more than 72 hours

Keep out of reach of children: if swallowed, get medical help or contact a Poison Control Center right away.
Directions: Instill 1 or 2 drops in the affected eye (s) as needed.

Other information: Store at room temperature (below 25°C, do not freeze)

Use only as directed. See back of box for complete directions.
